Transforming Nursing Through

Knowledge Doris Grinspun 2018-04-09
From conceptual and programmatic underpinnings to lived experiences of faculty, students, nurse executives, and bedside nurses, Transforming Nursing Through Knowledge leaves no stone unturned, allowing readers to gain a full understanding of a nurse's role in developing, using, and evaluating the impact of knowledge tools in healthcare. Authors Doris Grinspun and Irmajean Bajnok designed this text to be a practical, go-to book for healthcare organizations, nurse executives, and professionals learning to create world-class evidence-based cultures—how to get started, move forward, and achieve results. This book will help readers: * Understand the Registered Nurses' Association of Ontario (RNAO) Best Practice Guidelines (BPG) Program and its galvanizing power as a global movement that builds collective identity * Discover the latest in guideline development, implementation science, and evaluation at scale * Tackle healthy work environment challenges using BPGs to influence outcomes for health professionals, patients, organizations, and health systems * Use implementation science and social movement strategies to

successfully implement BPGs in academic and service settings * Recognize that transferring and sustaining evidence uptake require active and multilevel interventions * Learn to integrate technology, including nursing order sets, to support evidence-based clinical decision making * Propel large-scale organizational and health system change using diffusion theory and social movement thinking * Be inspired by nursing associations taking political leadership to secure the highest-quality health system for the public.

The Host Gaze in Global Tourism Omar Moufakkir 2013 Most tourism theories have been developed from the tourists' perspective and focus on the Anglo-American experience. This

unique book for researchers and students of tourism is the first to look at the host gaze; how it is constructed, how it has developed, how it varies between countries and how the tourism industry can affect it. By looking at the gazes of both Western and non-Western hosts, this book analyses the consequences such a gaze can have upon the tourist.

International Volunteer Tourism

Stephen Wearing 2013 Summary: This book revisits and further develops the topics and themes covered in *Volunteer Tourism: Experiences That Make a Difference*, written over 10 years ago. Concentrating on the experience of the volunteer tourist and the host community, this new edition builds on the view of volunteer tourism as a positive and sustainable form of tourism to examine a broader spectrum of behaviours and experiences and consider critically where the volunteer tourist experience both compliments and collides with host communities, using multiple case studies. The book has nine chapters and a subject index.

Regional Community Building in East Asia Lee Lai To 2016-09-01 This volume is a collection of papers written by nationals or former nationals of the respective country in ASEAN and Northeast Asia. Unlike other works written by scholars outside ASEAN or East Asia, it offers an insider's point of view of the 10 ASEAN states, China, Japan and South Korea on regional community building. While a nationalist perspective may permeate throughout the study, it is also clear that pursuing regional cooperation is considered to be important by the respective author, denoting the non-exclusivity between nationalism and regionalism and the mutual reinforcement of the two. Each author of this volume has made a deliberate effort to introduce and

survey the developmental challenges and experiences of his or her country from a historical perspective. All authors, without exception, have emphasized the importance and advantages in staying with ASEAN or linking up with ASEAN by China, Japan and South Korea in political-security, economic and socio-cultural terms. Their papers also reveal that the self-help and self-strengthening mechanism emphasized by the ASEAN Plus Three process will take time to bear fruits. In the meantime, it seems that bilateral interactions and cooperation between ASEAN and Northeast Asian states remain to be more dominant as shown in this study. One can argue that bilateral interactions are the building block of multilateralism interactions. To be sure, there is a deliberate effort in this study to highlight "unity in diversity" in East Asia in general and ASEAN in particular.

Exchange Online Fast Start Smart Brain Training Solutions 2014-06-02 What is Exchange Online? Exchange Online is available as part of an Office 365 plan and as a standalone service. Microsoft offers a variety of Office 365 plans that include access to Office Web Apps, the full desktop versions of Office, or both as well as access to Exchange Online. If you don't want to use Office 365, Microsoft also offers plans specifically for Exchange Online. In Exchange Online, email addresses, distribution groups, and other directory resources are stored in the directory database provided by Active Directory for Windows Azure. Windows Azure is Microsoft's cloud-based server operating system. Exchange Online fully supports the Windows security model and by default relies on this security mechanism to control access to directory resources. As you get started with Exchange Online, it's important to keep in mind that available features and options can change over time. Microsoft releases cumulative updates for Exchange on a fixed schedule and applies these cumulative updates to their hosted Exchange servers. This Fast Start guide begins by showing you the basics of Exchange Online, Office 365 and Windows Azure and then builds on that knowledge to show you how to work with these services using both the graphical tools and Windows PowerShell.

Business and Human Rights in Southeast Asia Mahdev Mohan

2014-09-25 Business and human rights has emerged as a distinct field within the corporate governance movement. The endorsement by the United Nations Human Rights Council of a new set of Guiding Principles for Business and Human Rights in 2011 reinforces the State's duty to protect against human rights abuses by third parties, including business; the corporate responsibility to respect human rights; and greater access by victims to effective remedy, both judicial and non-judicial. This book draws on the UN Guiding Principles and recent national plans of action, to provide an overview of relevant developments within the ASEAN region. Bridging theory and practice, the editors have positioned this book at the intersection of human rights risk and its regulation. Chapter authors discuss the implications of key case-studies undertaken across the region and various sectors, with a particular focus on extractive industries, the environment, and infrastructure projects. Topics covered include: due diligence and the role of audits; businesses' responsibilities to women and children; and the mitigation of human rights risks in the region's emerging markets. The book sheds light on how stakeholders currently approach business and human rights, and explores how the role of ASEAN States, and that of the institution itself, may be strengthened. In doing so, the book identifies critical challenges and opportunities that lie ahead for the region in relation to business and human rights. This book will be of excellent use and interest to scholars, practitioners and

students of human rights, business and company law, international law, and corporate governance.

Handbook of Tourism Impacts

Stoffelen, Arie 2022-05-13 This Handbook provides a comprehensive overview of current developments, issues and good practices regarding assessment in social science research. It pays particular attention to the challenges in evaluation policies in the social sciences, as well as to the specificities of publishing in the area.

Like Family Margaret K. Nelson 2020-04-17 For decades, social scientists have assumed that "fictive kinship" is a phenomenon associated only with marginal peoples and people of color in the United States. In

this innovative book, Nelson reveals the frequency, texture and dynamics of relationships which are felt to be "like family" among the white middle-class. Drawing on extensive, in-depth interviews, Nelson describes the quandaries and contradictions, delight and anxiety, benefits and costs, choice and obligation in these relationships. She shows the ways these fictive kinships are similar to one another as well as the ways they vary—whether around age or generation, co-residence, or the possibility of becoming "real" families. Moreover she shows that different parties to the same relationship understand them in some similar – and some very different – ways. Theoretically rich and beautifully written, the book is accessible to the general public while breaking new ground for scholars in the field of family studies.

Detecting Peripheral-based Attacks on the Host Memory Patrick Stewin 2014-12-27 This work addresses stealthy peripheral-based attacks on host computers and presents a new approach to detecting them. Peripherals can be regarded as separate systems that have a dedicated processor and dedicated runtime memory to handle their tasks. The book addresses the problem that

peripherals generally communicate with the host via the host's main memory, storing cryptographic keys, passwords, opened files and other sensitive data in the process – an aspect attackers are quick to exploit. Here, stealthy malicious software based on isolated micro-controllers is implemented to conduct an attack analysis, the results of which provide the basis for developing a novel runtime detector. The detector reveals stealthy peripheral-based attacks on the host's main memory by exploiting certain hardware properties, while a permanent and resource-efficient measurement strategy ensures that the detector is also capable of detecting transient attacks, which can otherwise succeed when the applied strategy only measures intermittently. Attackers exploit this strategy by attacking the system in between two measurements and erasing all traces of the attack before the system is measured again.
