University Physics Samuel J. Ling 2017-12-19 University Physics is designed for the two- or three-semester calculus-based physics course. The text has been developed to meet the scope and sequence of most university physics courses and provides a foundation for a career in mathematics, science, or engineering. The book provides an important opportunity for students to learn the core concepts of physics and understand how those concepts apply to their lives and to the world around them. Due to the comprehensive nature of the material, we are offering the book in three volumes for flexibility and efficiency. Coverage and Scope Our University Physics textbook adheres to the scope and sequence of most two- and three-semester physics courses nationwide. We have worked to make physics interesting and accessible to students while maintaining the mathematical rigor inherent in the subject. With this objective in mind, the content of this textbook has been developed and arranged to provide a logical progression from fundamental to more advanced concepts, building upon what students have already learned and emphasizing connections between topics and between theory and applications. The goal of each section is to enable students not just to recognize concepts, but to work with them in ways that will be useful in later courses and future careers. The organization and pedagogical features were developed and vetted with feedback from science educators dedicated to the project. VOLUME III Unit 1: Optics Chapter 1: The Nature of Light Chapter 2: Geometric Optics and Image Formation Chapter 3: Interference Chapter 4: Diffraction Unit 2: Modern Physics Chapter 5: Relativity Chapter 6: Photons and Matter Waves Chapter 7: Quantum Mechanics Chapter 8: Atomic Structure Chapter 9:

Fundamentals of Financial Accounting Fred Phillips 2021 "Fundamentals of Financial Accounting responds by using carefully chosen focus companies that students recognize and engage with in their everyday lives. From tech start-ups to some of the world's most familiar trademark brands, each chapter opens with an engaging scenario or story using a familiar company. The same focus company, such as Walmart, Cedar Fair, American Eagle, National Beverage, Under Armour, or General Mills, is used throughout the entire chapter so that students can see how the concepts and calculations apply to a real-world company they are already familiar with"--

Impact Of Covid - 19 Crisis On The Global Economy And Other Sectors Worldwide Dr. Prita D. Mallya 2020-06-08 This book highlights the impacts of COVID-19 on the global economy, at a time when the world economy has experienced large demand and supply shocks. To limit the transmission of the corona virus, all governments shut down production, restricted movement of people, etc, which led to severe curtailment in demand, and disruptions in supply chains all over the world. The COVID-19 pandemic has dragged the world economy into an abrupt and unforeseen recession. According to IMF estimates, world GDP will fall by over 3 percent due to the outbreak of this pandemic - the steepest slowdown since the Great Depression of the 1930s. The ILO has predicted a loss of about 25 million jobs due to this pandemic. Emerging markets will lose at least 2.4 percent of their GDP in 2020 alone. Loss in global travel revenue due to COVID-19 is estimated at USD 810.7 billion. Financial markets have been badly hit and about USD 83 million has been pulled out of developing markets since the outbreak of COVID-19. The list of sectors impacted by the COVID-19 outbreak, is endless All governments have announced stimulus packages comprising a mix of fiscal and monetary measures, but it is difficult to predict how quickly businesses will respond to these measures. The papers in this book, which are the proceedings of an online global conference, have attempted to analyze and summarize the thoughts of academicians on these vexed issues.

World Development Report 2018 World Bank Group 2017-10-16 Every year, the World Bank's World Development Report (WDR) features a topic of central importance to global development. The 2018 WDR—LEARNING to Realize Education's Promise—is the first ever devoted entirely to education. And the time is right: education has long been critical to human welfare, but it is even more so in a time of rapid economic and social change. The best way to equip children and youth for the future is to make their learning the center of all efforts to promote education. The 2018 WDR explores four main themes: First, education's promise: education is a powerful instrument for eradicating poverty and promoting shared prosperity, but fulfilling its potential requires better policies—both within and outside the education system. Second, the need to shine a light on learning: despite gains in access to education, recent learning assessments reveal that many young people around the world, especially those who are poor or marginalized, are leaving school unequipped with even the foundational skills they need for life. At the same time, internationally comparable learning assessments show that skills in many middle-income countries lag far behind what those countries aspire to. And too often these shortcomings are hidden—so as a first step to tackling this learning crisis, it is essential to shine a light on it by assessing student learning better. Third, how to make schools work for all learners: research on areas such as brain science, pedagogical innovations, and school management has identified interventions that promote learning by ensuring that learners are prepared, teachers are both skilled and motivated, and other inputs support the teacher-learner relationship. Fourth, how to make systems work for learning: achieving learning throughout an education system requires more than just scaling up effective interventions. Countries must also overcome technical and political barriers by deploying salient metrics for mobilizing actors and tracking progress, building coalitions for learning, and taking an adaptive approach to reform.
