A report to the rural school patrons. [Preliminary report of the Joint Committee on Rural Schools.] 272 p. plates Joint Committee on Rural Schools 1922

Making it comparable David Waddington 2007 One of the most significant developments in school education in recent years has been the development and introduction of standards, a subject of considerable controversy. This book is the result of a symposium held in Kiel, a symposium that was arranged by two leading science education groups, one at IPN (Leibniz Institute for Science Education at the University of Kiel) in Germany and the other at the University of York, UK. The seminar brought together experts from 15 countries. These countries include those that have extensive experience with the effects of standards on the educational system, on individual schools and teachers and on students. Other reports concern countries which are introducing them shortly and yet others on countries that are in the early stages of development of standards. 11 are from Europe and the others are from Australia, Israel, Taiwan and the U.S. The book is divided into three parts. In Part A, two of the organizers set the scene, describing the reasons for arranging the symposium and outlining the preparations and the work done at

the meeting. Part B contains 17 reports from the 15 countries and in Part C, there are two summaries, analysing the conclusions, taken from two different vantage points. The controversies surrounding standards remain.

However, this book gives a succinct and authoritative overall account of the advantages and disadvantages of their introduction taken from the experiences of many countries.

Geography, written in partnership with the Geographical Association. Encourage students to make links between case studies and their own local contexts as well as exploring the core themes and skills of the 0460 syllabus in the context of global case studies and processes. Prepare for exam success with full coverage of the core themes of Paper 1 (Population and Settlement, The Natural Environment, Economic Development and the Use of Resources) as well as the geographical and fieldwork skills elements of Papers 2, 3 and 4. Help students focus on achieving the best grades with excellent exam support for each Paper, with exam-style questions, answers at different levels and accompanying comments. Be confident in the content and approach - this resource is written by highly experienced Geography teachers, consulted edited by a CIE Principal Examiner, and produced in partnership with the UK Geographical Association - the home of best practice in Geography teaching.
