Mass Spectrometry in Structural Biology and Biophysics Igor A. Kaltashov 2012-04-03 With its detailed and systematic coverage of the current state of biophysical mass spectrometry (MS), here is one of the first systematic presentations of the full experimental array of MS-based techniques used in biophysics, covering both

fundamental and practical issues. The book presents a discussion of general biophysical concepts and a brief overview of traditional biophysical techniques before outlining the more advanced concepts of mass spectrometry. The new edition gives an up-to-date and expanded coverage of experimental methodologies and a clear look at MS-based methods for studying higher order structures and biopolymers. A must

for researchers in the field of biophysics, structural biology, and protein chemistry. Appendices: Persistent Traditions Luc W.S.W. Amkreutz 2013-12-19 The adoption of agriculture is one of the major developments in human history. Archaeological studies have demonstrated that the trajectories of Neolithisation in Northwest Europe were diverse. This book presents a study into the archaeology of the communities involved in the process of Neolithisation in the Lower Rhine Area (5500-2500 cal BC). It elucidates the role played by the indigenous communities in relation to their environmental context and in view of the changes that becoming Neolithic brought about. This volume contains the appendices to the thesis 'Persistent traditions. A long-term perspective on communities in the process of Neolithisation in the Lower Rhine Area (5500-2500 cal BC)'. These constitute a comprehensive inventory of 159, mostly excavated, archaeological sites in the Lower

Rhine Area for which general characteristics were recorded. Their analysis shows that the succession of Late Mesolithic, Swifterbant culture, Hazendonk group and Vlaardingen culture societies represents a continuous long-term tradition of inhabitation of the wetlands and wetland margins of this area, forming a culturally continuous record of communities in the transition to agriculture. The site catalogue forms both an overview of, and detailed introduction into, the site-based archaeology of this time frame. After demonstrating the diversity of the Mesolithic, the subsequent developments regarding Neolithisation are studied from an indigenous perspective. Foregrounding the relationship between local communities and the dynamic wetland landscape, the archaeological evidence regarding its regional inhabitation points to long-term flexible behaviour and pragmatic decisions being made. For the interpretation of Neolithisation this study offers a complementary approach to existing research.

Instead of arguing for a short transition based on the economic importance of domesticates and cultigens at sites, the emphasis is placed on the persistent traditions of the communities involved. New elements, instead of bringing about radical changes, are shown to be attuned to existing hunter-gatherer practices. By documenting indications of the mentalité of the inhabitants of the wetlands, it is demonstrated that their mindset remained essentially 'Mesolithic' for millennia.

Lipopolysaccharide Transport Paola Sperandeo
2022-09-24 This volume provides the most widely used protocols and techniques employed in lipopolysaccharide(LPS) transport studies.

Chapters detail identification and analysis of essential genes and crucial mutations in LPS transport-related genes, LPS profile determination, LPS chemical analysis, protein-LPS interaction, and LPS visualization. Written in the format of the highly successful Methods in Molecular Biology series, each chapter includes an introduction to the topic, lists necessary materials and reagents, includes tips on troubleshooting and known pitfalls, and step-by-step, readily reproducible protocols. Authoritative and cutting-edge, Lipopolysaccharide Transport: Methods and Protocols aims to deliver an overview on the multidisciplinary study of LPS transport and to identify new and innovative antibacterial strategies.

Benchmarking Telemedicine: Improving Health Security in the Balkans C.S. Stone 2017-10-25
Health security is dependent on many factors

such as: individual government policies and regulations; budgets; management systems; and the collection, analysis, use, and protection of data. Telemedicine has the potential to change how healthcare is delivered around the world, and has developed to the point where it is possible for its use to become commonplace. The questions are, however, whether and how the use of telemedicine will improve health security in Southeast Europe. This book presents papers from the NATO Advanced Research Workshop (ARW) on Benchmarking Telemedicine: Improving Health Security in the Balkans, held in Skopje, Macedonia, in November 2016. The aim of the workshop was to bring together people from a wide range of sectors within the telemedicine community with representatives of NATO Member and Partner countries to share information and develop solutions to health security issues. Participants addressed issues such as cyber security for the implementation of telemedicine; healthcare capabilities of deployed

and local medical equipment; learning methods; information sharing among local professionals; prevention and control of infectious diseases; best practices of telemedicine among NATO Member and Partner countries; integration of telemedicine across regions and borders; and telemedicine implementation. The book will be of interest to all those wishing to gain a better insight into the implications of telemedicine for health security.

New edition restructures the material to fit into modern computational methods and provides several spreadsheet examples throughout. Covers the syllabus for the Institute of Actuaries subject CT5, Contingencies Includes new chapters covering stochastic investments

returns, universal life insurance. Elements of option pricing and the Black-Scholes formula will be introduced.

The Startup Way Eric Ries 2017-10-17

Entrepreneur and bestselling author of *The Lean Startup*, Eric Ries reveals how entrepreneurial principles can be used by businesses of all kinds, ranging from established companies to early-stage startups, to grow revenues, drive innovation, and transform themselves into truly modern organizations, poised to take advantage of the enormous opportunities of the twenty-first century. In *The Lean Startup*, Eric Ries laid out the practices of successful startups – building a minimal viable product, customer-focused and scientific testing based on a build-measure-learn method of continuous innovation, and deciding whether to persevere or pivot. In *The Startup Way*, he turns his attention to an entirely new group of organizations: established enterprises like iconic multinationals GE and Toyota, tech titans like Amazon and Facebook, and the next

generation of Silicon Valley upstarts like Airbnb and Twilio. Drawing on his experiences over the past five years working with these organizations, as well as nonprofits, NGOs, and governments, Ries lays out a system of entrepreneurial management that leads organizations of all sizes and from every industry to sustainable growth and long-term impact. Filled with in-the-field stories, insights, and tools, *The Startup Way* is an essential road map for any organization navigating the uncertain waters of the century ahead.

Issues in Teaching, Learning and Testing

Speaking in a Second Language Mirosław Pawlak

2014-11-13 The volume constitutes a state-of-the-art account of issues related to teaching, learning and testing speaking in a second language. It brings together contributions by Polish and international scholars which seek to create links between theory, research and classroom practice, report the findings of studies investigating the impact of linguistic, cognitive and affective factors on the development and use of speaking skills, and provide concrete pedagogic proposals for instruction and assessment in this area. As such, the book will be of interest not only to second language acquisition theorists and researchers, but also to foreign language teachers willing to enhance the quality of speaking instruction in their classrooms.

Video Conference as a Tool for Higher Education

Enrica Caporali 2012 The book describes the activities of the consortium member institutions in the framework of the TEMPUS IV Joint Project ViCES - Video Conferencing Educational Services (144650-TEMPUS-2008-IT-JPGR). In order to provide the basis for the development of a distance learning environment based on video conferencing systems and develop a blended learning courses methodology, the TEMPUS Project VICES (2009-2012) was launched in 2009. This publication collects the conclusion of the project and it reports the main outcomes together with the approach followed by the different partners towards the achievement of the project's goal. The book includes several contributions focussed on specific topics related to videoconferencing services, namely how to enable such services in educational contexts so that, the installation and deployment of videoconferencing systems could be conceived

an integral part of virtual open campuses.

How I Did It Nate Clark 2020-07-14 How I Did It is a candid, thorough, science-based approach to losing fat, complete with workout plans and instructions for balancing macronutrients. It's full of personal insight, humor, stoic wisdom, and simple strategies that anyone can implement, no matter how hectic life gets. Do you dream of being lean and fit, but think it's impossible for you? It's absolutely possible and MUCH easier than you think! The key to losing weight is to maintain a caloric deficit. This book helps you calculate a caloric deficit to maximize fat loss and gain muscle without feeling tired and hungry. You don't need to starve yourself to lose fat. It's all about the math, pure and simple. How I Did It teaches you how to create a comfortable deficit of calories that will lead to incredible results. This book tells you how to get the body you've always wanted-no matter your age or current fitness level-without extreme dieting,

excessive cardio, boot camp classes, or dangerous supplements. No expensive equipment. No "bro-science" and no crawling across the gym floor on all-fours like an ass*le. If you need a painless, feasible plan for getting in shape, you want to read this book. Losing fat isn't a challenge when you follow the numbers. Everyone's body is different, but there are Universal truths that make or break any fat-loss program for all of us. This book explains the simple science behind building your ideal body based on your goals. Nate Clark spent most of his life wearing a t-shirt in the pool. He's not a personal trainer or a professional athlete. He's not selling you anything else. He's just a guy who finally figured it out, and transformed his body in ways he never thought possible. After 20 years of failed diets and way too much cardio, he discovered the truth about cutting fat and building lean muscle mass. At 40 years old, he's in the best shape of his life. In This Book You'll Discover: ► You DON'T need to spend endless

hours on a treadmill. Cardio is NOT the key to fat loss! ▶ You DON'T need to waste all your free time in a gym. You can train effectively with a 3-, 4- or 5-day split, ▶ based on YOUR goals. ▶ You DON'T need to spend \$250/ month on CrossFit. No more flipping tires in a parking lot! ▶ You CAN achieve your ideal body at any age. Don't let anyone tell you it's genetics or luck or that you need to devote your entire life to fitness. That's bullsh*t! ▶ You CAN be lean and muscular while also living your life, spending time with friends and family, and being a regular person. ▶ You CAN increase your energy and feel healthy by optimizing your diet and exercise routine without going to extremes. Buy How I Did It to learn how to achieve the body of your dreams!

The Founder's Dilemmas Noam Wasserman
2013-04 The Founder's Dilemmas examines how

early decisions by entrepreneurs can make or break a startup and its team. Drawing on a decade of research, including quantitative data on almost ten thousand founders as well as inside stories of founders like Evan Williams of Twitter and Tim Westergren of Pandora, Noam Wasserman reveals the common pitfalls founders face and how to avoid them.

Screens and Scenes Richard Kern 2018-06-21
This book examines the relationships between online visual interfaces and language use in educational contexts and the features that underpin them to explore the complex nature of online communication and its implications for educational practice. Adopting a case study approach featuring a global range of examples, the volume uniquely focuses on multimodal intercultural interactions, with a particular interest in videoconferencing, to look at how they project and reflect particular cultural values and tendencies concerning language use and how they elucidate the complex cultural

identifications and affiliations inherent in intercultural encounters. The book employs a diverse range of theoretical and research frameworks to highlight the dynamic connections between digital technology, social life, and language use, and the ways in which they can inform language education, making this an ideal resource for students and scholars in applied linguistics, communication studies, media studies, information studies, and education.

Membrane Biophysics Hongda Wang 2017-11-21

This book highlights recent advances in and diverse techniques for exploring the plasma membrane's structure and function. It starts with two chapters reviewing the history of membrane research and listing recent advances regarding membrane structure, such as the semi-mosaic model for red blood cell membranes and the protein layer-lipid-protein island model for nucleated tissue cell membranes. It subsequently focuses on the localization and interactions of membrane components, dynamic processes of membrane transport and transmembrane signal transduction. Classic and cutting-edge techniques (e.g. high-resolution atomic force microscopy and super-resolution fluorescence microscopy) used in biophysics and chemistry are presented in a very comprehensive manner, making them useful and accessible to both researchers in the field and novices studying cell membranes. This book provides readers a deeper

understanding of the plasma membrane's organization at the single molecule level and opens a new way to reveal the relationship between the membrane's structure and functions, making it essential reading for researchers in various fields.

Журнал сетевых решений / LAN Открытые системы 2017-01-12 В номере: Акселерация шкафов Сетевые и серверные шкафы – один из наиболее дешевых компонентов ИТ-инфраструктуры, тем не менее при их покупке заказчики все равно пытаются сэкономить. Между тем от выбора шкафа во

многом зависит общая стоимость владения инфраструктурой. Правильно подобранную стойку проще не только смонтировать, но и обслуживать впоследствии. Инновационные стойки и шкафы повышают эффективность ЦОД. Важность для ЦОД стоек и шкафов, занимающих лишь одну строчку в списке компонентов инфраструктуры, обычно недооценивают. Как правило, они выбираются исключительно на основании стоимости или приобретаются в комплекте с другим оборудованием, независимо от особенностей и достоинств данной продукции. Однако значительное число недавних инноваций указывает на то, что эти металлоконструкции могут оказать значительное влияние на плотность центров обработки данных и их охлаждение. Стойки в ЦОД – ключ к непрерывности бизнес-процессов. При правильном проектировании и надлежащем выборе, стойки являются фундаментальным фактором бесперебойной работы системы и

стратегическим ресурсом в обеспечении надежности центра обработки данных.
