**Interpersonal Conflict** Joyce L. Hocker 2022 "Revising this, the eleventh of edition of *Interpersonal Conflict*, brought me the opportunity to reflect on how the field has changed since I first began to research the field for my dissertation at the University of Texas in 1973. Since our first edition in 1978, conflict resolution has transformed into many subfields: peacemaking, third-party intervention, prevention of conflict, and the integration of personal transformation with interpersonal communication choices. This edition reflects many of the recent changes in the field. All chapters reflect recent research on interpersonal conflict. As has been our practice, I have removed earlier citations that

are so foundational that they need not be specifically cited. All chapters have been revised and in some cases, reorganized and rewritten for readability and clarity. New additions of "How would this sound?" give examples of dialogue the students may use to enlarge their conflict communication. Clearer organization and subheadings guide the reader through the text. The book still contains the 10 chapters in the same order"--

*Looseleaf for Interpersonal Conflict*  
Keith Berry 2021-03-26 *Interpersonal Conflict* 11e examines the central issues that inform conflict and, in turn, make readers' personal and professional lives challenging and fascinating. With new cases and applications that reflect cultural changes that shape the ways people

move through conflict, this new edition invites readers to reflect on, and better understand, conflict as it pertains to the unique vantage points of their lived experience.

### **Theories of Human Communication**

Stephen W. Littlejohn 2016-12-22 The Eleventh Edition is organized around: (1) elements of the basic communication model—communicator, message, medium, and “beyond” human communication; and (2) communication contexts—relationship, group, organization, health, culture, and society. A new chapter discusses four frameworks by which theories can be organized; students can see how theories contribute to and are impacted by larger issues about the nature of inquiry. To provide comprehensive, up-to-date coverage of theories, the authors surveyed articles in communication journals

published over the last five years. Each chapter covers an average of 13 theories, half of which are new to this edition. New areas covered include health, social media, and “beyond human communication”—communication between humans and nature, humans and objects, humans and technology, humans and the divine. “From the Source” boxes give students a look at the theorists behind the theories—their inspirations, motivations, and goals. Written in an accessible style, the book is ideal for upper-division undergraduate classes and as a comprehensive summary of major theories for the graduate level.
