Embryology of Angiosperms B. M. Johri 2012-12-06 Thirty-four years have elapsed since the publication of the late Professor P. Maheshwari's text, *An Introduction to the Embryology of Angiosperms*, a work which for many years served as an invaluable guide for students and a rich source book for research workers. Various texts dealing with sections of the broad spectrum of topics encompassed by Maheshwari in his book have appeared in the interim, but a compendious modern work dealing with the whole field has been lacking. This present volume splendidly meets the need, and it is altogether fitting that Professor B. M. Johri, long an associate and close colleague of Professor Maheshwari and himself a prolific contributor to the subject, should have undertaken the task of editing it. When Maheshwari wrote, it was still feasible for one author to handle the subject, but today even someone with his fine breadth of vision and depth of understanding could not, alone, do it justice. So the effort has to be a collaborative one; and Professor Johri's achievement has been to bring together a team of authoritative collaborators, assign them their responsibilities, and put them to work to produce a text as integrated in its treatment as the diversity of the subject would allow. The product vividly illustrates the advances that have been made in the study of angiosperm reproductive systems in the last 30 years, and the book is surely destined to become the new standard for student and researcher alike.

The Model Millionaire Oscar Wilde 2021-02-26 "Romance is the privilege of the rich, not the profession of the unemployed." Hughie, a charming young man with no money, wants to marry a girl named Laura. But Laura's father is concerned with Hughie's lack of wealth and tells him he can only have his daughter if he comes up with 10,000 pounds. Defeated, Hughie visits his artist friend, who in painting a portrait of a beggar. Meeting the beggar outside, Hughie gives him some money. What he doesn't know is that the man isn't a beggar at all but a wealthy baron, and Hughie's generosity might just be the thing to change his life. *The Model Millionaire* is a charming and funny little story, similar in setting to *The Picture of Dorian Gray*, but far more optimistic. A delightful read. Oscar Wilde (1854-1900) was an Irish playwright,

novelist, essayist, and poet, famous for 'The Picture of Dorian Gray' and 'The Importance of Being Earnest' to name a couple. He was believed to be a homosexual and met a lot of resistance in his life on that account. He died in Paris at the age of 46.

The Routledge Handbook of the Other Backward Classes in India Simhadri Somanaboina 2021-11-16 This handbook presents an authoritative account of the development of movements, thoughts and policies of OBCs (Other Backward Classes) in India. Despite the adoption

of egalitarian principles in the Indian Constitution, caste inequalities, discrimination and exclusionary practices against people from backward classes and other lower castes continue to haunt them in contemporary India. A comprehensive work on the politics of identity and plurality of experiences of OBCs in India, this handbook: — Features in-depth research by eminent scholars on the Other Backward Classes (OBC) social and political thought, OBC movements and OBC development and policy making. — Discusses the life, ideologies and pioneering contributions by Gautam Buddha, Sant Kabir, Jotirao Phule, Savitribai Phule, Shahu Maharaj, Narayana Guru, B.R. Ambedkar, Ram Manohar Lohia, and E V Ramasamy Periyar and leading social reform movements. — Examines OBC issues with case studies from various Indian states to look at issues of pre- and post- Mandal India; backward caste movements; and reclamation of the Bahujan legacy. — Critiques public policies and programs for the development of OBCs in India. — Reviews the status of Muslim OBCs in India and of the invisibilized nomadic communities. — Reviews the impact of globalization on the economically backward lower castes and the impact of development initiatives for the excluded people. The first of its kind, this handbook will be essential reading for scholars and researchers of exclusion and discrimination studies, diversity and inclusion studies, Global South studies, affirmative action, sociology, Indian political history, Dalit studies, political sociology, public policy, development studies and political studies.

The Faber Book of Modern Verse Michael Roberts 2009 First published in February 1936, just under a year from when the idea for it was first discussed, this is one of the most important and influential anthologies of the twentieth century. Since then three further editions by, in succession, Anne Ridler, Donald Hall and Peter Porter have been published. All took as their kernel the original selection by Michael Roberts. This "Faber Finds" reissue restores that pristine selection. More likely than not, the original idea was T. S. Eliot's, the choice of editor was undoubtedly his, and it was an inspired one. Michael Roberts was a poet himself, and a good one, but more important for this task was his acute

awareness of the poetry scene, and his sense of the modern movement within it. Yes, his purpose was tendentious. He excludes some poets he admires such as Edmund Blunden and Walter de la Mare because (they) 'seem to me to have written good poems without having been compelled to make any notable development of poetic technique.' On the other hand, 'I have included only poems which seem to me to add to the resources of poetry, to be likely to influence the future development of poetry and language . . .' From the very start (and could there be a more arresting one?) with Gerard Manley Hopkins' "The Wreck of the Deutschland" Michael Roberts powerfully and consistently fulfils that aim. Philip Hobsbaum, in "The Oxford Companion to Twentieth-Century Poetry," says of "The Faber Book of Modern Verse," 'it also encapsulates, as no other literary document quite does, the innovative quality of the 1930s.'

Contemporary Issues in Accounting Elaine Conway 2018-06-01 The book explores the developing challenges and opportunities within the business and finance world which are likely to impact the accounting

profession in the near future. It outlines a number of approaches to ensure that the accountants of the future are equipped with a useful awareness of some of the key topic areas that are quickly becoming a reality and helps bridge the gap between academia and practice. The chapters are standalone introductory pieces to provide useful précis of key topics and how they apply to the accounting profession in particular. It aims to deliver key readings on 'hot topics' not addressed in other texts which the accounting profession is tackling or are likely to tackle soon. Hence the book provides accounting students and researchers a solid grounding in a broad range of highly relevant non-technical accounting themes, looking at the bigger environment in which future accountants will be operating, involving considerations of strategic corporate governance issues and highlighting competences beyond the standard technical accounting skill sets.
