Phil Edmonston 2012-12-01 Canada's  
automotive "Dr. Phil" says there's  
never been a better time to buy a new  
car or truck, thanks to a stronger  
Canadian dollar, a worldwide  
recession driving prices downward,  
and a more competitive Japanese auto  
industry that's still reeling from a  
series of natural disasters.

**Chrysler TorqueFlite A-904 & A-727**

Tom Hand 2017-10-16 The A-904 and  
A-727, debuting in 1960 and 1962,  
respectively, are 3-speed automatic  
Chrysler TorqueFlite Transmissions.  
In Mopar circles, they have become  
synonymous with strength, durability,  
and performance. In fact, 43 years  
after its first application, A-904s  
were still found in the Jeep lineup!  
TorqueFlites are known for their  
dependability, but many have endured  
a tremendous amount of abuse over 50-  
plus years when hooked up to V-8  
Mopar powerplants. There is little  
doubt that some of these automatics  
could be prone to failure, or at  
least need a thorough rebuild. Tom  
Hand shares his decades of experience  
rebuilding TorqueFlite transmissions  
with chapters dedicated to  
troubleshooting, disassembly and  
reassembly, performance  
modifications, post-installation  
procedures, and the most thorough  
source guide offered in print, ever.  
The author walks you through the  
TorqueFlite rebuild with color photos  
showcasing step-by-step procedures  
with highly detailed, easy-to-follow  
text. This book will keep money in  
your pocket and add experience to  
your résumé, but more important, it  
will help you get your Mopar back on  
the road! p.p1 {margin: 0.0px 0.0px

[T]axing Greenhouse Gases Lex  
Fullarton 2019-03-30 Lex Fullarton  
takes a closer look at the three  
pillars of the sustainable  
development framework known as the  
Triple Bottom Line (TBL). The concept  
of the TBL is that for a project to  
be sustainable it must not simply be  
profitable in economic terms, but it

must also benefit society and enhance the natural environment. In the 21st century, the greatest threat to Earth's natural environment and the population of the planet is the rise of greenhouse gas emissions caused from burning fossil fuel as an energy source. The rise of GHG emissions has resulted in a rise in the ambient air temperature of the Earth's atmosphere and is resulting in a significant change in climatic conditions on Earth. Fullarton scrutinizes the problem of getting industry and governments to understand the significance of creating harmony within the TBL. One of the main problems is that partisan politics tends to fragment the factors of the TBL rather than bring them together. Fullarton takes a strong stand in suggesting that taxation systems, which have traditionally been viewed primarily as a means of raising government finance, can be effectively applied to influence industrial and consumer attitudes towards transiting away from polluting fossil-fuel energy sources towards non-polluting renewable energy use.
