Comrades Stephen E. Ambrose 2000-09-17 Comrades is a celebration of male friendships. Acclaimed historian Stephen Ambrose begins his examination with a glance inward -- he starts this book with his brothers, his first and forever friends, and the shared experiences that join them for a lifetime, overcoming distance and misunderstandings. He next writes of Dwight D. Eisenhower, who had a golden gift for friendship and who shared a perfect trust with his younger brother Milton in spite of their apparently unequal stations. With great emotion, Ambrose describes the relationships of the young soldiers of Easy Company who fought and died together from Normandy to Germany, and he recalls with admiration three unlikely friends who fought in different armies in that war. He

recounts the friendships of Lewis and Clark and of Crazy Horse and He Dog, and he tells the story of the Custer brothers who died together at the Little Big Horn. Ambrose remembers and celebrates the friends he has made and kept throughout his life. Comrades concludes with the author's recollection of his own friendship with his father. "He was my first and always most important friend," Ambrose writes. "I didn't learn that until the end, when he taught me the most important thing, that the love of father-son-father-son is a continuum, just as love and friendship are expansive."

**Introducing Religion** Daniel L. Pals 2009 What is religion? How is it to be explained? Why do human beings believe in divinities? Why do the beliefs and behaviors we typically describe as religious so deeply affect the human personality and so subtly weave their way through human society? *Introducing Religion: Readings from the Classic Theorists* presents eleven key texts from influential theorists who played a pivotal role in the modern enterprise of explaining the phenomenon of religion. These writings seek to account for the origin, function, and enduring human appeal of religion by drawing on methods of scientific scholarship unconstrained by theological creeds or confessional commitments. An ideal companion to author Daniel L. Pals' textbook, *Eight Theories of Religion*, Second Edition, or other beginning texts, *Introducing Religion* opens with selections from the works of Edward Burnett Tylor and James Frazer--Victorian pioneers in anthropology and the comparative study of religion. It then offers entry into the provocative analyses of Sigmund Freud, Emile Durkheim, and Karl Marx, whose aggressive reductionist approaches framed the explanatory debate for much of the century to follow. Responses to reductionist theories--and new directions in explanation--claim a place in selections from the works of philosopher-psychologist William James, theologian Rudolf Otto, sociologist Max Weber, and comparativist Mircea Eliade. The volume ends with discussions drawn from the celebrated field studies of British anthropologist E. E. Evans-Pritchard and the interpretive anthropology of American theorist Clifford Geertz, whose fieldwork took him to both Asia and the Middle East. Brief career portraits of the theorists at the outset of each chapter give context to the readings, and a general introduction features guiding questions designed to help students assess and compare

the different theories. Offering an illuminating overview of this controversial and engaging subject, *Introducing Religion: Readings from the Classic Theorists* is ideal for introductory courses in religion as well as courses in method and theory of religion, world religions, and sociology, psychology, or anthropology of religion.
