Growing Up With Tanzania F. Hirji

2014-07-17 In Growing up with
Tanzania. Karim Hirji, a renowned
Professor of Medical Statistics and

Fellow of the Tanzania Academy of Science, presents a multi-faceted, evocative portrait of his joyous but conflicted passage to adulthood during colonial and early-Uhuru Tanzania. His smooth style engages the reader with absorbing true tales, cultural currents, critical commentary and progressive possibilities. By vibrantly contrasting the hope-filled sixties with the cynical modern era, he also lays bare the paradoxes of personal life and society, past and present.

Transforming Reading Skills in the Secondary School Pat Guy 2015-05-14 Transforming Reading Skills in the Secondary School is a commonsense text designed to help practitioners working in a mainstream context. The book suggests ways to develop the underlying skills necessary for good

reading through multiple pathways such as mainstream subject lessons, individual and small group support sessions, whole school initiatives, the use of reading mentors and home-school liaison opportunities. Brimming with ideas and activities, Pat Guy explores a variety of different aspects of reading, including: how reading is taught and why it is such an important skill for the individual how to motivate the reluctant reader the role played by the mainstream & specialist teacher underlying problems pupils may face how to increase parental involvement reasons why a pupil's comprehension might be limited the role of the School Librarian the relevance to reading of vocabulary and general knowledge. Anyone wanting to develop the reading skills of secondary

pupils who struggle will find this a resource they return to time and time again.

More Good Questions Marian Small
2010-05-15 We know that Differentiated Instruction (DI) helps all students to learn. Yet DI challenges teachers, and nowhere more than in mathematics. In this new book, written specifically for secondary mathematics teachers, the authors cut through the difficulties with two powerful and universal strategies that teachers can use across all math content: Open Questions and Parallel Tasks. Showing teachers how to get started and become expert with these strategies, this book also demonstrates how to use more inclusive learning conversations to promote broader student participation. Strategies and

examples are organized around Big Ideas within the National Council of Teachers of Mathematics (NCTM) content strands. With particular emphasis on Algebra, chapters also address Number and Operations, Geometry, Measurement, and Data Analysis and Probability, with examples included for Pre-Calculus. To help teachers differentiate math instruction with less difficulty and greater success, this resource: Underscores the rationale for differentiating secondary math instruction. Provides specific examples for secondary math content. Describes two easy-to-implement strategies designed to overcome the most common DI problems that teachers encounter. Offers almost 300 questions and tasks that teachers and coaches can adopt immediately, adapt,

or use as models to create their own, along with scaffolding and consolidating questions. Includes Teaching Tips sidebars and an organizing template at the end of each chapter to help teachers build new tasks and open questions. Shows how to create a more inclusive classroom learning community with mathematical talk that engages participants from all levels.

Maths, Stage 7 Naomi Norman 2017-12
This brand new, three-level series, provides coverage of the Cambridge Secondary 1 maths curriculum framework. Written by an experienced author team, the series comprises a comprehensive Student Book, extensive Workbook and supportive Teacher Guide. Student Book 7 provides comprehensive coverage of the Secondary 1 syllabus through 9 topic-based units. The series is influenced by a mastery approach, with topics being thoroughly embedded before learners move on. * New concepts are presented through worked examples, which lead learners, step-by-step, through the concepts, with clear and

detailed explanations. * Links are made between topics, encouraging learners to build on relevant fluency from previously learnt topics, and practise mathematical concepts in a different context. * Learners build 21st-century skills such as mental maths strategies, pattern spotting and problem solving, enabling them to talk about mathematics with confidence. * With challenge questions integrated throughout, learners can deepen their understanding. * Learners are encouraged to reflect on their learning, in order to build learner independence. * The series builds on the foundations laid down in primary maths, and prepares learners for embarking on IGCSE maths. Collins is working closely with Cambridge International Examinations towards

endorsement of the series.

Teacher Education in Professional Learning Communities Xuefeng Huang 2018-06-20 This book explores the unique experiences of a sister school network in Canada and China contextualized through the lens of the Reciprocal Learning Project, which supports the relationship between a school network and teacher education exchange program of two countries. Huang uses theoretical viewpoints from teacher learning and comparative education research to analyse and interpret what has happened in the emerging cross-cultural school network. The book

juxtaposes teacher learning and comparative education research from Shanghai and Ontario as teachers in the two places interact and provides detailed descriptions of teacher collaboration to show how these collaborations were initiated, developed, and sustained, as well as the impact brought about from these collaborations. The book offers a unique opportunity to examine how Canadian and Chinese teachers receive and react to opportunities of cross-cultural collaboration and learning.
