Musical Sound Effects

Jean-Michel Réveillac
2018-03-07 For decades performers, instrumentalists, composers, technicians and sound engineers continue to manipulate sound material. They are trying with more or less success to create, to innovate, improve, enhance, restore or modify the musical message. The sound of distorted guitar of Jimi Hendrix, Pierre Henry's

concrete music, Pink Flyod's rock psychedelic, Kraftwerk's electronic music, Daft Punk and rap T-Pain, have let emerge many effects: reverb, compression, distortion, auto-tune, filter, chorus, phasing, etc. The aim of this book is to introduce and explain these effects and sound treatments by addressing their theoretical and practical aspects.

Tuning, Timbre,

Spectrum, Scale William

A. Sethares 2013-06-05

Tuning, Timbre,

Spectrum, Scale focuses

on perceptions of

consonance and

dissonance, and how

these are dependent on

timbre. This also

relates to musical

scale: certain timbres

sound more consonant in

some scales than others.

Sensory consonance and

the ability to measure

it have important

implications for the

design of audio devices

and for musical theory

and analysis.

Applications include

methods of adapting

sounds for arbitrary

scales, ways to specify

scales for nonharmonic

sounds, and techniques

of sound manipulation

based on maximizing (or

minimizing) consonance.

Special consideration is

given here to a new

method of adaptive

tuning that can

automatically adjust the

tuning of a piece based

its timbral character so

as to minimize

dissonance. Audio

examples illustrating

the ideas presented are

provided on an

accompanying CD. This

unique analysis of sound

and scale will be of

interest to physicists

and engineers working in

acoustics, as well as to

musicians and

psychologists.

Critical CALL – Proceedings of the 2015 EUROCALL Conference, Padova, Italy Francesca

Helm 2015-12-02 The theme of the conference this year was Critical CALL, drawing inspiration from the work carried out in the broader field of Critical Applied Linguistics. The term 'critical' has many possible

interpretations, and as Pennycook (2001) outlines, has many concerns. It was from these that we decided on the conference theme, in particular the notion

that we should question the assumptions that lie at the basis of our praxis, ideas that have become 'naturalized' and are not called into question. Over 200 presentations were delivered in 68 different sessions, both in English and Italian, on topics related specifically to the theme and also more general CALL topics. 94 of these were submitted as extended papers and appear in this volume of proceedings.
