Driving the USA Harry Keeling 2014-06-27 This is my quest to drive single handedly to every one of the 50 United States of America in alphabetical order. My tick point for each State would be the capitol building in the Capital city. I would be starting and finishing in Washington DC. From beautiful vistas of lakes and mountains to snow storms in idaho and ice covered roads in Washington (out come the snow-chains) to 45 mph winds sending tumble weeds hurtling down at me like a horde of Orcs at a combined speed of over 100mph in Montana. Torrential rain in Arkansas and the measured mile in Utah. Nothing would stop me.... or would it?

This edition incorporates new writings and recent developments, such as a chronology documenting changes associated with the mascot issue, along with information on state legislation. Other new material incorporates powerful commentary by Native American veterans, who speak to the issue of stereotyping against their people in the military. The Ultimate Scene and Monologue Sourcebook Ed Hooks 1994 Preparing for an audition and unsure of what you want to do?The Ultimate Scene and Monologue Sourcebookis the book you've been waiting for. Unlike "scene books" that reprint 50 to 75 monologues excerpted from plays but don't include any background information, this annotated guide tells you what you really need to know about audition material from more than 300 contemporary plays. Here is how the book works. Suppose that you're looking for a dramatic male/female scene. When you scan "Part One: Play Synopses and Analyses," you come across an entry forThe Middle of the Nightby Paddy Chayefsky. This is what you see: The Middle of the Night by Paddy Chayefsky (Samuel French) Synopsis: A kindly 53-year-old widower falls in love with a 23-

year-old woman who is unhappily married to a musician. No one in their circle of acquaintances approves of this union, but their love is true. Analysis: Excellent human drama, frequently touching. Actors who play the widower need to have a good feel for New York City/Brooklyn speech patterns. This sensitivity isn't as essential for the part of the woman. All levels. Scenes/Monologues: Male Monologues (1), Female/Female Scenes (1), Male/Female Scenes (2) In addition to basic information about the play (author and publisher), the entry provides you with the story line, a critique of the play, and the number of audition-worthy monologues and scenes it contains. If the description of this particular play piques your interest, your next step is to turn to "Part Six: Male/Female Scenes" for specifics about the selection. This is what you'll see there: The Middle of the Night by Paddy Chayefsky (Samuel French) Drama: Act II, Scene 2, pp. 40-44; The Manufacturer (53) and The (23). After an unsatisfactory attempt at lovemaking, The Manufacturer feels awful that he wasn't able to perform ually. The is very understanding. He then asks her to marry him. The actor playing The Manufacturer must have a good feel for regional New York speech patterns. This skill is less critical for the actress playing The . Start, The Manufacturer: "I'm sorry, Betty." End, The Manufacturer: "Oh, my sweet , I love you so much you don't know. If you change your mind tomorrow, I won't be angry with you. I won't lie to you, Betty. I'm afraid." This entry tells you what type of scene this is (dramatic), where you'll find the selection (act, scene, and page numbers), the length of the scene, the names and ages of the characters, the context in which the characters are speaking, and the first and last lines of the scene. If the material seems appropriate, all you have to do is get a copy of the play and get to work. BecauseThe Ultimate Scene and Monologue Sourcebookenables you to make informed decisions about the suitability of more than 1,000 monologues and scenes-which you can find easily through the book's extensive cross indexes—you'll gain a critical edge in the auditioning process.

THE BOOK OF JAZZ - A Guide to the Entire Field Leonard Feather 2017-02-07 ORIGINAL DESCRIPTION (1957) - Jazz at last has matured to a full-fledged art, not only in this country, hut throughout the world as well. What has been known as an American folk music is now becoming an international form of expression, with artists in all countries constantly exchanging ideas and expanding the limits of their medium. No longer is it possible for the well-informed person, the person interested in the latest developments in the art world, to relegate jazz to the realm of simple, untutored, dance-hall music. Leonard Feather, author of the famous Encyclopedia of Jazz series, has written this hook for the widest possible audience—from the newcomer to the field who asks the basic, most-difficult-to-answer question, "What is jazz?," to the jazz musician himself (one of whom recently asked, "Who is Bessie Smith?"). Here is a guide to jazz in all its phases: its nature, its sources, instruments, sounds, performers- and the future of jazz.A large part of the book consists of chapters devoted to the story of the role played by each instrument and its major performers. Each history begins with a non-technical discussion of the instrument itself: its function, its range, how it was first used and how it is now used in jazz. It goes on to tell about the artists themselves and how they developed the instrument, their special contribution and their relative importance in the entire world of jazz. From this unique approach emerges a clear and fascinating picture of jazz.The section titled "The Anatomy of Improvisation" presents for the first time actual musical illustrations of the jazz improvisations of 15 of the great soloists from Louis Armstrong and Benny Goodman to Art Tatum, Lester Young and Dizzy Gillespie. Each solo is studied in detail and with a clarity as enlightening to the listener as to the musician. These solos lead into a unique analysis of the nature of jazz —its harmony, rhythm and structure—and show how it has evolved from the music of the earliest days through ragtime, swing and hop to the latest innovations.In chapters devoted to the origins of jazz, the new evidence is bound to gain the attention of the entire jazz world. Drawing on conversations with musicians from various parts of the country, this section sheds new light on the particular places where jazz was first played. By exploring the sources, it reveals why jazz had its beginnings in the United States and what musical influences and social forces combined to produce this music.In a chapter entitled "Jazz and Bace," the whole story of racial discrimination in jazz is presented in unprecedented detail. It tells of the early segregation in bands, of the gradual breaking down of the color barriers first by the musicians themselves and then by the public, and of the problems still to be resolved.To this illuminating guide, Leonard Feather brings his many years of experience in the jazz field both as critic and musician. For the person who has long sought a true guide to the enthralling world of jazz; for the student, the fan and the musician to whom jazz is an exciting territory, THE BOOK OF JAZZ provides the much-needed succinct story of this important new art form of the twentieth century.

Quantitative Techniques for Competition and Antitrust Analysis Peter Davis 2009-11-16 This book combines practical guidance and theoretical background for analysts using empirical techniques in competition and antitrust investigations. Peter Davis and Eliana Garcés show how to integrate empirical methods, economic theory, and broad evidence about industry in order to provide high-quality, robust empirical work that is tailored to the nature and quality of data available and that can withstand expert and judicial scrutiny. Davis and Garcés describe the toolbox of empirical techniques currently available, explain how to establish the weight of pieces of empirical work, and make some new theoretical contributions. The book consistently evaluates empirical techniques in light of the challenge faced by competition analysts and academics--to provide evidence that can stand up to the

review of experts and judges. The book's integrated approach will help analysts clarify the assumptions underlying pieces of empirical work, evaluate those assumptions in light of industry knowledge, and guide future work aimed at understanding whether the assumptions are valid. Investment Aftercare Explained Carolina Arriagada Peters 2021-11-30 This book is the first to systematically map the last step of the foreign investor's journey, usually referred to as post-investment, aftercare or

business retention and expansion. It provides a wide range of approaches and strategies for host economies to better retain foreign investors, encourage follow-on expansions and achieve greater local economic embeddedness through a multi-stakeholder dialogue, leading to improvement of the overall business climate. Global foreign direct investments reached US$1.5 trillion in 2019, but this figure reduced by over 42% in 2020, due to the pandemic. Against this backdrop, retaining established investors became even more important. Numerous organisations all over the world are dedicated to attracting foreign companies to invest in their markets. Facilitating this effort is a dynamic and competitive industry that involves international organisations supporting capacity building, think tanks, academia and consultants. However, once foreign companies decide to invest, a critical question arises: how can host economies grow and retain these foreign investments? Many host governments could do much better, as there is very little post-investment support for these foreign companies to help them grow their businesses throughout different stages of investment, business and economic cycles. This is where aftercare comes in. In this book, the authors include diverse examples from around the world to demonstrate aftercare best practices in action. This book is an essential read for all public administration staff related to FDI attraction and promotion, practitioners in the private sector and FDI consultants. It will also be of great interest to multilateral organisations seeking to organise seminars and training courses for capacity building. The book will also benefit researchers, academics and postgraduate students of international relations, foreign trade and internationalisation. For further information, see www.aftercareexplained.com.
